Abstract	Abstract is not available,take US2003051061□A1 for reference ABSTRACT An acceptance filter (1) according to the invention for filtering identifiers in messages which are in the form solely of a hardware circuit and is provided jointly for the allocated users (2, 3, 4). An identifier is received and examined to see whether the message to which the received identifier belongs is relevant. If appropriate a corresponding acceptance signal is sent to this allocated user (2, 3, 4).
